RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 182 pages. Original publisher: Washington, DC : Office of Water, U. S. Environmental Protection Agency, 1996 LC Number: QH76 . P77 1996 OCLC Number: (OCoLC)48946232 Subject: Wetland conservation -- United States. Excerpt: . . . Factors to Consider When Selecting BMPs system breaks wetlands into systems, subsystems, and classes analogous to plant or animal taxonomic classifications. The classification system developed by Cowardin and others (1979) is very comprehensive. However, because it contains too much detail for this document, a simpler classification system, 3 In their classification system, Mitsch proposed by Mitsch and Gosselink (1993), is used here. and Gosselink (1993) divided wetlands into two major groups--coastal and inland-as shown in Table 2-1. Some wetlands in the United States are not adequately described by the Mitsch and Gosselink (1993) classification system, but the system is intended as only a preliminary guide to evaluate wetlands. Hydrology Hydrology is described by Mitsch and Gosselink (1986) as probably the most important factor in the establishment and maintenance of specific types of wetlands and wetland processes. Precipitation, surface water inflow and outflow, groundwater...

This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.
