Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Technical Report, Vol. 1: Agricultural Drainage Water Treatment, Reuse, and Disposal in the San Joaquin Valley The San Joaquin Valley Drainage Program was established in mid-1984 as a cooperative effort of the U.S. Bureau of Reclamation, U.S. Fish and Wildlife Service, U.S. Geological Survey, California Department of Fish and Game, and California Department of Water Resources. The purposes of the Program are to investigate the problems associated with the drainage of irrigated agricultural lands in the San Joaquin Valley and to formulate, evaluate, and recommend alternatives for the immediate and long-term management of those problems. This report is one of several Program technical reports presenting research findings to date and implications on specific topics such as geohydrology of the San Joaquin and Tulare Lake Basins, fish and wildlife resources, public health, agricultural setting, planning methods, and drainage water treatment, reuse, and disposal. The data and information in these reports are being used in formulating and evaluating drainage water management options and preliminary alternative plans, which will be presented in a separate report in late 1988. A draft report outlining latest study results and alternative plans will be completed for public review in the fall of 1989. Final study results and recommended area-specific plans will be presented in the Program s final report in the fall of 1990. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
