

Effects of Uranium-Mining Releases on Ground-Water Quality in the Puerco River Basin, Arizona and New Mexico

Filesize: 5 MB

Reviews

Excellent electronic book and helpful one. It usually does not cost a lot of. I am quickly will get a pleasure of reading through a written publication.

(Bernardo Feeney Jr.)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1997-06 Excerpt: . distribution of vertical and horizontal hydraulic conductivity (Kz and K/J, (3) distribution of storage coefficients, and (4) flux at all boundaries. Flux, as used in this report, is the volumetric rate of flow per unit area entering or leaving the cross section. Physical dimensions of the cross section were determined from well logs, aerial photographs, and transit-stadia surveys. The model grid consisted of 7 layers, 1 row, and 43 columns (fig. 16). Model layers were designed to approximate the extent and occurrence of sand and clay layers in the alluvial aquifer. Distribution of Kh was estimated on the basis of slug-test results and was modified slightly during model calibration. Distribution of K, and storage coefficients for some layers were estimated during calibration. Specified flux-boundary conditions were used and included the special case of no flow (fig. 16). No-flow boundaries were specified for the lower and lateral boundaries of the cross section. The use of no-flow conditions at the lateral boundary under the stream was based on the assumption that the ground-water flow system is symmetric about the stream channel. Specification of the lower boundary and lateral boundary 360 METERS EXPLANATION ACTIVE MODEL CELL INACTIVE MODEL CELL X/ STREAMBED MODEL CELL H AQUITARD IcW-2 MODEL CELLS CORRESPONDING TO H CONTINUOUS-RECORD MONITOR WELLS AND WELL NAME Figure 16. Model geometry and boundary conditions.
