Excerpt: .a sharp focus of the original, use a sharply printed letter or figure, such as is produced by copper-plate printing upon white paper or bristol-board. This is attached to the original to be copied by means of a pin, and the sharply cut letter will form a convenient focusing guide in all the subsequent operations. Any similar device which will give a figure permitting convenient and sharp focusing will serve. Having obtained the miniature negaPrinting ve desired, we now prepare a number of such negatives for printing. The printing-frames used for this purpose are 4x5. Two pieces of orange-colored paper are cut to the size of the negative, and inscribed with a circle made with a compass and lead-pencil, to a size slightly less in diameter than the watch-cap or dial to which the photograph is eventually to be transferred. This mask is to be fitted upon the face, or film side, of the negative. Now cut out another circular mask, a little smaller in diameter than the first. This must be fitted upon the front, or glass side, of the negative. The object of these two masks is to produce a safe edge to hold the carbon image to the metal of the watch-cap, or to the face of the dial, during development. A touch of paste at each corner of the masks will hold them in position. The negative is now placed at the jfcSn center of a clean 4 x S...
