

Differential Equations: Theory, Technique and Practice with Boundary Value Problems

Filesize: 9.57 MB

Reviews

An incredibly wonderful book with perfect and lucid explanations. It normally is not going to price a lot of. I am just very happy to tell you that this is the greatest pdf we have go through within my personal lifestyle and could be he finest book for at any time.

(Bart Lowe)

DIFFERENTIAL EQUATIONS: THEORY, TECHNIQUE AND PRACTICE WITH BOUNDARY VALUE PROBLEMS

Taylor & Francis Inc. Hardback. Book Condition: new. BRAND NEW, Differential Equations: Theory, Technique and Practice with Boundary Value Problems, Steven G. Krantz, Differential Equations: Theory, Technique, and Practice with Boundary Value Problems presents classical ideas and cutting-edge techniques for a contemporary, undergraduate-level, one- or two-semester course on ordinary differential equations. Authored by a widely respected researcher and teacher, the text covers standard topics such as partial differential equations (PDEs), boundary value problems, numerical methods, and dynamical systems. Lively historical notes and mathematical nuggets of information enrich the reading experience by offering perspective on the lives of significant contributors to the discipline. "Anatomy of an Application" sections highlight applications from engineering, physics, and applied science. Problems for review and discovery provide students with open-ended material for further exploration and learning. Streamlined for the interests of engineers, this version: * Includes new coverage of Sturm-Liouville theory and problems * Discusses PDEs, boundary value problems, and dynamical systems * Features an appendix that provides a linear algebra review * Augments the substantial and valuable exercise sets * Enhances numerous examples to ensure clarity A solutions manual is available with qualifying course adoption. Differential Equations: Theory, Technique, and Practice with Boundary Value Problems delivers a stimulating exposition of modeling and computing, preparing students for higher-level mathematical and analytical thinking.
